

# Langkawi

*Malaysia*  
*Truly Asia*

# A Taste of Wild Langkawi

*The landscape of Langkawi is dominated by lush rainforests and limestone outcrops which abound with a wide variety of flora and fauna.*

*Observation and rest stations on Mount Mat Cincang*

A most captivating way of appreciating Langkawi's wondrous greenery would be a bird's-eye view from a chartered helicopter. More conveniently, one can take the modern cable car up Mount Mat Cincang. At the peak are observation stations to view the spectacular surrounding landscape and seascape.

An extraordinary experience would be the heart-stopping rainforest adventure in which visitors ascend to the forest canopy. This escapade involves a 120-metre slide and a 30-metre vertical abseil passage. The view from the canopy is simply magnificent.

A boat trip up the Kilim river is a most rewarding experience. The area of about 100 sq. km has been gazetted as Kilim Nature Park.

The park encompasses vast tracts of virgin forests, mangroves, and secluded lagoons, with a fascinating ecosystem. The rare experience of feeding eagles in their natural setting is the highlight of the trip.

Sited at Kampung Belanga Pecah along Jalan Ayer Hangat is the Langkawi Bird Paradise, the first fully covered walkway bird park in Asia. The park possesses more than 150 exotic bird species with over 2,500 birds, including colourful macaws, flamingos, hornbills, cockatoos and many others.

In a similar vein is Taman Buaya (Crocodile Farm), home to a thousand crocodiles of different ages. Daily highlights are the awesome display of crocodile frenzy at feed time and daring physical interaction with the creatures by the farm's professional handlers.

Having fun with exotic birds
